ATOM GRIP HD (AG02-H)

The Rigtec Atom Grip HD is the essential projector hanging bracket. Offering a feature packed solution to safely and securely suspend your projector from a truss or bar.

Get creative with your projection installations. The Atom Grip HD unlocks the full potential of the Rigtec Air Frame, allowing single point hanging for landscape, portrait or floor projection.

Suspend stacked projectors securely with the Atom Grip HD. With a WLL of 370KG, the Atom Grip HD is capable of suspending multiple projectors stacked in Rigtec Air Frames from a single point, reducing set up time without sacrificing the safety of the install.

Ultimate versatility, with 25° tilt and 360° rotation, the Atom Grip HD allows precision adjustments and a simple solution for creative angled projection set ups.

The Atom Grip HD is compatible with all Rigtec Air Frames.
