ATOM GRIP (AG02-D)

The Rigtec Atom Grip Duo is the essential projector hanging bracket. Offering a feature packed solution to safely and securely suspend your projector from a truss or bar.

Get creative with your projection installations. The Atom Grip Duo unlocks the full potential of the Rigtec Air Frame, allowing twin point hanging for landscape, portrait or floor projection.

Suspend stacked projectors securely with the Atom Grip Duo. The twin point hanging system allows the weight to be distributed evenly between the two truss chords, which helps prevent the truss from twisting, even when angling the projector.

Ultimate versatility, with 25° tilt and 360° rotation, the Atom Grip Duo allows precision adjustments and a simple solution for creative angled projection set ups.

The Atom Grip Duo is compatible with all Rigtec Air Frames.

SPECIFICATIONS

Part Number: AG02-D

Description: Atom Grip Duo

Flying Weight: 6.5kg / 14.33 lbs

Length: 400mm (15.7")

Width: 164mm (6.5")

Height: 267.6mm (10.5")

Working Load Limit (WLL): 295kg / 650.36 lbs

Tilt Adjustment: 25°

Rotation Adjustment: 360°

Tube Diameter: Ø38-51mm

Bolt Size: 4 x M8

Bolt Spacing: 100mm (3.9")
